Ecovation recommends Insulco Glass Wool Batts because they are certified by Good Environmental Choice Australia ([www.geca.org.au](http://www.geca.org.au)) and have been awarded the ECO LABEL.

Benefits of Glass Wool Batts

- Reduce heating & cooling by up to 50% and in turn reduce greenhouse gasses
- Keep your home cooler in Summer
- Significantly reduce heat loss during Winter
- Non combustible
- Vermin and Mildew Resistant

## How much insulation will you need?

To work out how much insulation you need, draw a plan of the outside of your home and measure the perimeter of each area to be insulated in meters, multiply the length by the width to give the total area in m<sup>2</sup>.

## How much will it cost?

The average lowset home with a standard pitched roof area up to 105m<sup>2</sup> would have a typical cost of \$1000.00 leaving enough to upgrade your electrical hot water system to an energy efficient heat pump or solar evacuated tube system.

## How soon can I get started?

Simply contact Ecovation to arrange a site inspection to confirm your supply and installation costs, if you are happy with our recommendation, you enter into an agreement and pay an initial 50% deposit with the balance payable on completion of installation. To claim your rebate, you hang onto your receipt and submit this to the Australian Govt after the 1st of July.

Rebate applications are now available on the Australian Govt's web site – visit <http://www.environment.gov.au/rebates>
